AT SUEK

Since 2012, SUEK has been actively developing the Apsatsky coking coalfield, situated near the Trans-Siberian railway and around 1,000km away from the nearest city and surrounding infrastructure. We have built a new employee camp, with essential social infrastructure including accommodation, canteen and sports and recreational facilities.

SUPPORTING REGIONAL ECONOMIES

FAR REACHING

As one of the largest employers in the Russian coal industry, we provide jobs for almost 33,500 people across different regions, from miners and engineers to lab specialists and machine operators. We also invest in remote areas and provide opportunities for external contractors in local industries.

DEEPLY INVOLVED

Wherever we operate, SUEK aims to bring stability and development. As one of the largest payers of tax in the regions where we operate, we directly support regional budgets while helping to develop social and economic infrastructure.

\$59m
